

the best start's here...

Welcome to the
nursery that gives
your child more...

helping your child see the bigger picture.

It's a big World. And it's changing fast. Our children understand this because we take great efforts to show them.

Environmentally, we are working towards eco-nursery status. Plus every child that starts with us gets a tree planted to reduce their carbon footprint.

Globally, we sponsor under-privileged children in Africa and nearer to home we support local events as well as holding many fun events of our own.

These areas are included in the topics that are covered in the nursery so that the importance of nature, conservation and our place on the planet is understood.

Children leaving Seasons are aware, responsible and knowledgeable – ready to take on the complexities of life!

We operate to the highest standards - and we can prove it!

Every nursery will tell you it is the best. But as a parent you want to be sure.

That's why Seasons is currently working towards Bristol Standard accreditation, an independent award that checks all areas of operation - from educational curriculum to child safety, staff training to levels of care.

We also employ National Day Nurseries Association to carry out regular inspections of our nursery in between OFSTED visits to make sure our practice is constantly improving in all of the important areas

We do this to make sure our nursery is always at the top of its game, because that means your child gets the best care.

healthy living for a healthy life.

We have developed a unique healthy living initiative called Fit 4 Life which helps our children learn best habits for eating, exercise and hygiene. We like to think of it as a blueprint for a long, healthy life. Full details are available at the nursery.

All of our food is freshly cooked on-site and designed to promote good eating practice. Of course, we involve our children too – they plant, grow, pick and cook (as well as eat!) their own vegetables in our vegetable garden.

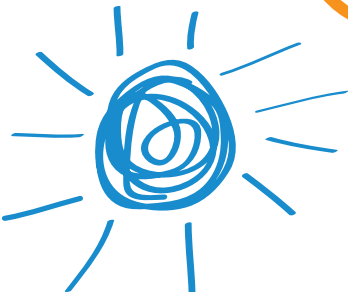

And we have 3 completely separate gardens, specifically designed for different age groups. So our children can spend lots of time outdoors, playing with children of their own age in an environment designed specifically for them.

We put more into our days.
So your child takes more out.

Keeping children busy doing things that they enjoy keeps them happy, and so helps their development massively. That's why the early years curriculum is so important.

But we make sure there's plenty more variety in our nursery so that your child really gets a head start. Little act classes, stretch and grow, baby sensory sessions and much more all come as standard.

Simply a wonderful place for children to spend time.

Seasons is a magical place for children.

Our building is made entirely of timber - imagine the biggest log cabin you have ever seen!

Its construction fits in with our philosophy of using environmentally-friendly, natural materials wherever we can. This follows right through with the type of toys, resources and activities we use day to day.

Each room has large doors to the outside which we open as much as possible to bring the outdoors inside all day long, all year round. Of course, each room has its own garden which the children have the freedom to roam around in whenever they want.

Bright, spacious and interesting - the perfect place for your child to play and learn - come see for yourself!

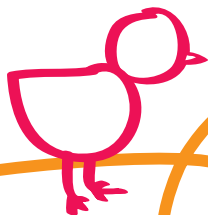

to a child, happiness is being met by
the same familiar faces day-in, day-out

Our staff are the best, so we do our best to keep them happy. Which means we pay them well, train them well and, most importantly, listen to what they have to say

All so that your child gets the very best care, from a skilled, motivated carer, every day.

And you can be confident that won't change.

10% off
your first
3 months
with this voucher

Terms and Conditions. 10% off your first 3 months' fees will be reimbursed to you after you have attended the nursery for 6 months. If you leave before 6 months, no discount will be given. The discount will be removed from your invoice. The amount of discount cannot exceed the total invoice amount of your 6 month invoice.
